------------	---------------	-------------------------

(1) Axis M3005-V viewing down hallway

(1) Axis M3026-VE Placed above door on exterior of building viewing entry way

If cameras are communicating on a network provided by the customer, I.P. Address, Subnet Mask and Gateway information are required for each camera. The cameras listed above will require (3) static IP address which shall be provided by the customer.

**Head End Location**

One (1) NVR/server shall be provided by Customer, which shall be located in IT room.

**Programming**

Dakota Security shall provide all necessary labor to configure and program the system.

**Training**

Dakota Security shall provide a qualified trainer to your job site to train key personnel. Included in our contract price is an initial training session to instruct you on the basic operation of your system. Additional or repeat training sessions are available upon request and shall be invoiced at our standard labor rate.

**Cabling**

Wire, cable and installation of wire and cable shall be completed by Dakota Security.

**Remote Viewing Connectivity (Inside Network)**

The security solution Dakota Security will provide has a feature that allows designated users to view system activity remotely within the network. Dakota Security will load the remote viewing software on one (1) client-designated workstation and instruct the client on how to load on subsequent workstations inside the network.
